The project aims at offering a useful and valuable set of AAL-related functionalities and services for older adults as well as informal and formal carers through the use of connected TV devices based on the HbbTV standard complemented with a mobile second screen. The goals are:

1. Provide a **help exchange system** enabling older adults to offer/ask for support for daily life activities to/from others.
2. Provide **access to service providers** like meals on wheels, shopping assistance, house-keeping, taxi, medical help or assistance, etc.
3. Offer **support functions** like reminders, news, weather, etc.

"GeTVivid – Let's do things together" aims at supporting older adults with mild impairments to manage their daily activities in their (residential) home and aims at improving their quality of life, autonomy and participation in social life.
